

# STUDENTS4SUSTAINABILITY

## Intake form funding application S4S

### Contact details

Names project team members:

Contact person project:

E-mail address contact person:

Phone number contact person:

Dutch home address contact person:

Bank account number (IBAN):

Bank account on the name of:

### Stakeholders

People involved from the TU Delft:

Contact person in country of destination:

Involved party in country of destination:

Other stakeholders involved:

### Information project

Name of project:

Estimated day of departure:

Country of destination:

Address of destination:

### Media

Which relevant media do you use to share the progress of the project? Think of Facebook, Instagram, blogs, websites and other media platforms.

### Budget

Make sure to attach a budget for your project with clear expenses. Please explain expenses if not directly clear. Also, take in mind that labor can't be funded by S4S. **An intake form is only complete when a budget is attached!**

## Description of the project

Give a brief description of the project and give a short summary of the planned activities. Also make sure to attach some guiding images and/or videos to strengthen the information.

## Subsidy criteria

### Guidelines for financial support

1. The project is/will be a project that takes place in an area in need of development and is done by students whose majority is enrolled at TU Delft somewhere in the last two years.
2. The project is innovative. For S4S this means that the project develops a prototype or adds value to an already existing product (by doing research e.g.).
3. The project corresponds to the people-planet-profit ideology. This means:
  - (a) People: Representation of the interests of people here and now, there and later.
  - (b) Planet: In a way that the environment benefits.
  - (c) Profit: It is economically attractive.
4. The project has to be a structural improvement compared to the current situation.
5. The project should be applicable more than once.
6. The project should have potential to develop to a larger scale in the future with the help of local entrepreneurs.
7. A local entrepreneur/partner and the community is involved in the project.

8. The project is a technical application that is in line with a TU Delft approach.
9. Personal participation and enthusiasm is required.

**Explanation on the satisfaction of the criteria**

Give an explanation on how the project satisfies the 9 guidelines

## Targets

1. Delft' technology is applied in an evident manner.
2. There is a long term vision in which continuity is ensured.
3. The results are measurable.

## The relation between S4S and the project

1. The expected financial support of S4S will be clarified and won't contain overhead costs such as travel costs and print costs.
2. During the maturity of the project, S4S will receive an update at least three times (one before travelling, one during your stay in the country of destination and one after you finished the project) in English and Dutch with a couple of images.
3. The project team will provide S4S with new donors who donate €2 for a minimum of 8 months. The amount of requested donors depends on the amount of subsidy.
4. S4S will be informed about the departure date. *An intake form submitted less than 2 weeks before departure will not be processed.*

## After finishing the form

If you completed the form, make sure to sent the form with the attached budget and some guiding images/video's to [projects@students4sustainability.nl](mailto:projects@students4sustainability.nl).
